## Insect Repellent & Sunscreen Towel

### Use Anywhere:

- Waste Water Treatment Plants
- Telephone Companies
- City Recreation Departments
- Construction Companies
- Municipalities
- Highway Departments
- Golf Courses

DEFENDER insect repellent and sunscreen towel offers protection from insects and the sun's rays in the convenience of an all-in-one individually wrapped premoistened towel. Each DEFENDER towel contains 20% DEET formulation. It also offers a SPF (Sun Protecting Factor) of 25, which means it will protect exposed skin from the sun's damaging UVA/UVB wavelengths for up to 25 times longer than unprotected skin.

- ✓ All-in-One Insect Repellent and Sunscreen - Contains 20% DEET & Offers SPF 25 Protection From the Sun
- ✓ Repels Mosquitoes, Ticks, Fleas, Biting Flies, Gnats and Chiggers on Exposed Skin
- ✓ Portable & Easy to Use - 100 Individually Wrapped 8 x 10 Inch Premoistened Towels per Case

...setting performance standards worldwide...

## APPLICATIONS

DEFENDER's 20% deet formulation repels mosquitoes, ticks, fleas, biting flies, gnats and chiggers, while at the same time protecting skin from exposure to the sun with an SPF 25 rating.

The Occupational Safety and Health Administration (OSHA) recommends using sunscreen for protection against overexposure to the sun's harmful UVA/UVB rays. OSHA also recognizes the West Nile Virus and Lyme disease as concerns for outdoor workers. Insect repellents containing DEET are recommended by OSHA and the Center for Disease Control and Prevention (CDC) for the best protection against biting insects which can carry the virus and disease.

**Areas of Use For DEFENDER:** construction companies • sanitation crews • golf courses • highway departments • utility work • landscaping • city recreation departments • municipalities • waste water treatment plants • any work or activity that requires outdoor exposure to flying and biting insects and the sun.

## DIRECTIONS

Remove towelette and unfold fully. For maximum protection, wipe evenly and completely cover all exposed skin. Do not apply near eyes and mouth, and apply sparingly around ears. Each towelette will cover the face and arms or an equivalent size area. Apply only to exposed skin - do not use under clothing. Never apply over cuts, wounds, or irritated skin. Do not allow children to handle this product, and do not apply to children's hands. When using on children, apply the product to the child yourself. Avoid overexposure; frequent reapplication and saturation are unnecessary. Use just enough DEFENDER to cover exposed skin. Wash hands after treatment to avoid incidental contact. After returning indoors, wash treated skin with soap and water or bathe. Remove and wash treated clothing before wearing it again. For ticks and chiggers, also apply liberally to shoe tops, socks and openings of clothing. Do not apply on or near: acetate, rayon, spandex or other synthetics other than nylon, furniture plastics, leather, watch crystals and painted or varnished surfaces, including automobiles.
