

- ✓ **Features Low Foaming and High Lubricity Characteristics**
- ✓ **Provides Rapid Heat Removal**
- ✓ **Protects Against Rust And Corrosion**
- ✓ **Improves Work Piece Quality**
- ✓ **Convenient, Portable Packaging Allows For Anywhere, Anytime Use**
- ✓ **Extends Tool Life, Reduces Downtime and Increases Production**

...setting performance standards worldwide...

# APPLICATIONS

TAPS is a heavy duty concentrated cutting oil fortified with active sulfur and an extreme pressure additive.

TAPS is formulated for a wide variety of machine shop applications. This high performance coolant and lubricant increases production, protects cutting tools and provides quality machined parts. Good wetting ability gives excellent cooling of work piece. Provides excellent rust protection and is low foaming. Not recommended for use on copper or aluminum.

TAPS is ideal for use in machine shops, automotive, manufacturing, oil fields, plumbing, agricultural, construction, marine and proves to be a *must* for any maintenance department. Convenient, portable aerosol packaging is easy to store in a tool box and can be used anywhere, anytime, when you need it.

## TECHNICAL DATA

<b>Classification:</b>	Aerosol cutting fluid for high speed equipment
<b>Flammability:</b>	Nonflammable
<b>Spray Pattern:</b>	Wet mist
<b>General Appearance:</b>	Opaque, dark brown liquid
<b>Odor:</b>	Sulfur/fatty acid
