

# **ANT-I-DOTE**

## **Crawling Insects Powder**

**ANT-I-DOTE Crawling Insects Powder kills insects by abrasively removing and breaking down the oily protective membrane which covers the insect's body, legs and other moving parts. Death results from dehydration (drying out), as the product absorbs up to 50% of the insect's fluids! An insect's body is approximately 65% water, and when as little as 30% dehydration occurs, the insect will die. Without water to replace such losses, crawling insects die within 1 to 2 days.**

- ✓ **Highly Effective Against Ants, Bedbugs, Boxelder Bugs, Cockroaches, Crickets, Fleas, Silverfish, Ticks, Sowbugs, Millipedes and Houseflies Resting on Treated Surfaces**
- ✓ **Death of Insect Results From Dehydration**
- ✓ **ANT-I-DOTE Contains Silicon Dioxide - Chemically Inert and Odorless**

...setting performance  
standards worldwide...

## APPLICATIONS

With ANT-I-DOTE there is an initial kill followed by the gradual, steady kill of the remaining insects. It remains effective until depleted and will continue to kill insects as long as the product stays dry!

## DIRECTIONS

APPLY ONLY TO DRY SURFACES. ANT-I-DOTE kills insects by absorbing the fluids right out of their bodies! Insects dry-up...and die!

### HOME and RESIDENTIAL PEST CONTROL

Shake this container/applicator vigorously to fluff the product. To apply, open cap and squeeze/puff the product through applicator tip. INSECTS KILLED by ANT-I-DOTE, when used as directed, include the following: Ants, Bedbugs, Boxelder bugs, Cockroaches (German, American and Brown Banded), Crickets, Garden Slugs entering dry indoor porch or patio areas, Houseflies coming to rest on treated surfaces, Fleas, Millipedes, Silverfish, Sowbugs and Ticks. Make sure to only apply to dry surfaces.

### SPECIFIC AREAS TO APPLY

Apply behind stoves, refrigerators, under sinks, along baseboards, under the edges of rugs, in cracks and crevices, in window/storm sills and frame openings, on and beneath dry porches and indoor patios where insects are seen. Product is not effective in damp areas. For control of crawling insects (including cockroaches) indoors, apply lightly to any dry area where crawling insects are seen, breed or have become a nuisance. For control, insects must crawl into and come in contact with the dry powder.

**FOR ANTS:** Apply along baseboards, entry cracks and crevices and to areas of intensive ant activity such as doors, windows, screens, porches, basements, attics, ant nests (mounds) and ant trails.

**FOR FLEAS:** For control treat pet quarters, bedding, and indoor kennel areas. Sleeping mattresses in the home may also be treated. Apply monthly or as needed.

**FOR BEDBUGS:** Squeeze container to apply light puffs of the dust to mattress surfaces, tufts and seams. Dismantle and treat bed parts, joints and interior areas. All cracks and crevices in the bedroom should be treated.

### BUSINESS and COMMERCIAL PEST CONTROL

Commercial Transportation Facilities, Food Processing Plant Premise/Equipment, Eating Establishments, Food Handling Areas (food contact), Eating Establishment Food Serving Areas (food contact), Food/Grocery Marketing/Storage/Distribution Facility Premise.

### FOR FOOD AND FEED AREAS

Apply to control the insect pests as listed below as a "Crack and Crevice" or a "Spot" treatment in areas where food or feed is - Received, Processed (including enclosed processing systems), Packaged (Bottled, Boxed, Canned, Wrapped), Transported, Stored (including waste), Prepared

or Served. As a crack and crevice treatment apply sparingly into cracks and crevices using equipment designed to place powder into specific locations. Limit spot treatments to wall or floor surfaces where pests have been seen or where pests are suspected of hiding. No individual spot treatment should exceed 2 sq. ft. All food or feed must be removed or covered before treatment. Treat open spaces below floors, above ceilings, within walls, under stairs, underneath and behind equipment or appliances, around pipes, under sinks, in utility closets and around garbage and waste cans.

### FOR NON-FOOD AREAS

Apply (as directed above) as a "Crack and Crevice" or a "Spot" treatment for control of Ants, Boxelder Bugs, Crickets, Roaches and Silverfish to areas where pests hide, run or land, such as attics and spaces above suspended ceilings, basements, and crawl spaces, cracks in baseboards, moldings, and door frames, corners, in closets, cabinets, and shelves, window sills and frames, under and behind furniture and appliances, etc. Work into and apply under rugs, door mats, couches, etc.

## TECHNICAL DATA

ACTIVE INGREDIENTS: 100%	
Silicon Dioxide,	
from diatomaceous earth.....	85%
Other Elemental Oxides.....	10%
Moisture.....	5%
TOTAL .....	100.00%
